

RISHABH SHARMA

Head of Product — Payments, Treasury & Platform Growth

Bengaluru, India · +91 70877 50777 · rishabh071106@gmail.com · linkedin.com/in/rishabh-sharmaimk · Open to Singapore relocation

Product leader with **15+ years** across global fintech, payments and banking platforms, of which **8+ years** are in product management and **5+ years** leading high-performing, geographically distributed product squads. Currently **Vice President — Product Management at J.P. Morgan**, owning the global digital lending platform across CIB and CB clients. Hands-on operator with deep experience in **real-time payment rails, treasury, liquidity & FX, platform APIs, partner onboarding and ICP-led use-case enablement**. Known for translating ambiguous market signals into scalable roadmaps, partnering closely with engineering, compliance and GTM, and delivering measurable P&L impact in matrixed, multi-region environments.

CORE COMPETENCIES

Product Strategy & Roadmap	GTM & ICP Enablement	P&L & Business Cases
Pay CORE Platform & APIs	Treasury, Liquidity & FX	Real-Time Payments & Wallets
Onboarding & KYC Platforms	Cross-Functional Leadership	Matrix & Multi-Region Ops
AI/ML & Agentic Workflows	Regulatory & Compliance	Data, Metrics & Experimentation

PROFESSIONAL EXPERIENCE

Vice President — Product Management

J.P. Morgan Chase & Co. · Bengaluru, India · Jun 2020 – Present

- Own the **global product strategy and roadmap** for the digital loan booking & servicing platform serving Commercial & Investment Banking clients across **30+ countries**; defined the target-state architecture and led the shift from legacy COBOL/manual workflows to an **AI-native, agentic ecosystem**.
- Lead a cross-functional squad of **25+ engineers, product owners and data specialists** across India, US and EMEA in an onshore–offshore model; coach 4 product managers, run quarterly OKRs, sprint reviews and stakeholder steering committees.
- Architected **API and Kafka-based integrations** with Loan IQ, ACBS and 12+ upstream underwriting and pre-booking systems on AWS — the platform pattern is directly analogous to **Pay CORE platform & API orchestration** across counterparties.
- Partnered with **Treasury, Liquidity and Risk** teams to model collateral, exposure and FX hedging flows; delivered controls that improved limit utilisation accuracy and shortened reconciliation cycles.
- Built the **partner onboarding platform** with country-specific KYC, AML and regulatory workflows; secured approvals across multiple jurisdictions and reduced onboarding lead time by **~40%**.
- Drove **Go-To-Market** for two new client segments — defined ICP, pricing tiers, sales enablement collateral and rollout playbook with Marketing, Legal and Compliance; adoption climbed from **40% to 85% in 12 months**.
- Delivered **~30% FTE optimisation** and accelerated time-to-market by introducing AI/ML-based document extraction, intelligent routing and exception handling — established the platform as a strategic differentiator in the bank's global lending transformation.

Senior Consultant — Product & Platform Modernisation

Wipro Technologies (client: Standard Bank Group) · Johannesburg, South Africa · Oct 2011 – Jun 2020

- Led the **core banking and payments modernisation** programme for one of Africa's largest banks — designed the SAP-based target architecture and migrated **26 partner platforms** (mobile money, card schemes, agency banking, remittance corridors) into a unified ecosystem.
- Drove a high-impact **AML & compliance** initiative across **14 African markets**, hardening the bank's risk framework and cutting false-positive alerts by **~35%**.
- Managed a global delivery team of **38 developers, BAs and data specialists**; introduced Agile ceremonies and migrated the programme from Waterfall, lifting release cadence from quarterly to fortnightly.

- Partnered with enterprise architects on **API & integration strategy** for self-service channels, branch operations and mobile wallets — directly relevant to Thunes' Direct Global Network ambitions.
- **6 years of international experience** across Sub-Saharan Africa with deep exposure to mobile money rails (M-Pesa, MTN, Airtel) and emerging-market payment behaviours.

SELECTED OUTCOMES

- Scaled JPM Loan Booking Platform adoption from **40% → 85% in 12 months** via React UI, embedded Tableau analytics and structured change management.
- Cut onboarding lead time by **~40%** through a workflow-driven KYC platform with country-specific rule packs.
- Delivered **~30% FTE optimisation** using AI/ML document extraction across global lending operations.
- Reduced AML false positives by **~35%** across **14 African markets** at Standard Bank.
- Honoured at JPM with **MVP Award (Q3'22)** and **Team of the Quarter (Q3'24)**; won Wipro's White Paper Contest on the Future of Software Testing.
