PROFILE · ROADMAP · COMPETENCIES · EXPERIENCE · AI AGENTS · OUTCOMES · EDUCATION

Product leader with **15+ years** across **fintech and enterprise** domains, driving **innovation, scalability and AI/ML-powered solutions** aligned with business objectives. Currently **Vice President — Product Management at J.P. Morgan**, spearheading the strategic vision and roadmap for a **global digital loan booking platform** and the shift from legacy processes to an **AI-enabled, agentic ecosystem**. Strong expertise in **cloud platforms, data strategy, AI/ML integration and advanced analytics**, leveraging insights to shape product vision and strengthen customer engagement; proven competency in **customer journey mapping, data visualization & business analytics** (Tableau, in-app analytics) and **cross-functional leadership** across geographies.

CAREER ROADMAP

CORE COMPETENCIES

AI-Driven Product Development	Agentic AI & Multi-Agent Architecture	Predictive Data Modeling
Customer Journey Mapping	Data Visualization & Analytics	Innovation Management
Product Strategy & Scalable Roadmap	Agile & Lean Product Management	Digital Transformation
Cross-Functional Leadership	Stakeholder Management	Team Leadership & Management

AI AGENTS & MULTI-AGENT ARCHITECTURE

Spearheading the shift from legacy loan booking to an **AI-enabled, agentic ecosystem** serving CIB and CB clients worldwide. Builds production multi-agent systems, an AI assistant for delivery acceleration, and a personal agent stack.

- **Multi-Agent Architecture for Loan Booking (production):** Defined the target-state architecture as a network of specialist agents — extraction, validation, regulatory checks and downstream synchronisation — integrated with **Loan IQ, ACBS and upstream underwriting / pre-underwriting systems** via **APIs and Kafka on AWS**, replacing legacy manual workflows with an **AI-enabled, agentic ecosystem** for CIB and CB clients worldwide.
- **AI/ML Document Extraction & Automation:** Applied AI/ML-based document extraction and automation across the global lending platform — delivering **measurable FTE optimisation** and accelerating time-to-market, establishing the platform as a strategic differentiator in the bank's global lending transformation.
- **AI Assistant for Delivery Speed (Standard Bank):** Developed an AI assistant during the core banking modernisation programme to enhance delivery speed; recognised for **innovation and thought leadership**.
- **TaskFlow (personal build, 2026):** Daily-routine app powered by an agent stack that plans the user's day, generates **chapter-wise book briefs, ElevenLabs voice affirmations** and **guided meditations**, served through a streaming audio layer with a cache-warmup agent.
- **Tooling fluency:** Claude / Anthropic API, OpenAI, ElevenLabs voice, RAG with vector stores, agent frameworks (tool-use, function calling, MCP-style servers), prompt & eval harnesses; **Loan IQ, ACBS, AWS, Kafka, React, Tableau**.

PROFESSIONAL EXPERIENCE

JPM Vice President — Product Management

J.P. Morgan Chase & Co. · Bengaluru, India · Jun 2020 – Present

- Spearheading the **strategic vision and roadmap** for a **global digital loan booking platform**, defining the target-state architecture and driving the shift from legacy processes to an **AI-enabled, agentic ecosystem** serving **CIB and CB clients worldwide**.
- Formulating and delivering an **enterprise-scale architecture on AWS**, integrating with **Loan IQ, ACBS and upstream underwriting / pre-underwriting systems** through **APIs and Kafka**, facilitating seamless loan booking and downstream system synchronisation.
- Collaborating with global **risk, compliance and regulatory bodies** to achieve **country-specific approvals** and alignment, while advancing **multi-LOB expansion** in adherence to international banking standards.
- Defining and maintaining a **dynamic product roadmap**, capturing insights from stakeholders, users and data analytics, and transforming them into scalable features while **prioritising delivery based on business value**.
- Leading and coordinating a **cross-functional global workforce of 25+ engineers, product owners and data experts**, ensuring agile execution, sprint delivery and dependency resolution across diverse business lines and geographies.
- Delivering **measurable FTE optimisation** and accelerating time-to-market by applying **AI/ML-based document extraction and automation**, establishing the platform as a **strategic differentiator** in the bank's global lending transformation.

WIP Senior Consultant — Product & Platform Modernisation

Wipro Technologies (client: Standard Bank Group) · Johannesburg, South Africa · Oct 2011 – Jun 2020

- Executed the end-to-end **digital overhaul of core banking** by assessing current-state processes, designing the target architecture in **SAP**, and transitioning from legacy **COBOL-based systems**.
- Spearheaded comprehensive **core modernisation and large-scale data migration**, streamlining and integrating **26 partner platforms** into a unified ecosystem.
- Directed a high-impact **AML compliance initiative**, enhancing regulatory alignment and fortifying the bank's **risk management framework**.
- Supervised a **38-member global team** of developers, business analysts and data specialists, overseeing system integration, migration and delivery across **self-service channels and branch operations**.
- Partnered with enterprise architects and senior technology leaders to devise cost-efficient solutions, enable workforce upskilling and accelerate product delivery through **Agile Transformation practices**.

SELECTED OUTCOMES & RECOGNITION

- **JP Morgan Loan Booking Platform adoption: 40% → 85% in 12 months** via React-based interface, Tableau dashboards, in-app analytics and structured change management.
- **Led Agile transformation at Standard Bank (2016)**, driving migration from Waterfall to Agile by establishing sprints, ceremonies and cross-functional global delivery practices.
- **JP Morgan MVP Award (Q3 2022)** and **Team of the Quarter Award (Q3 2024)** for exceptional contributions to Commercial Banking initiatives.
- Winner — **Wipro White Paper Contest on the Future of Software Testing**; developed an **AI assistant at Standard Bank** to enhance delivery speed.
